

UPDATES ON COVID-19

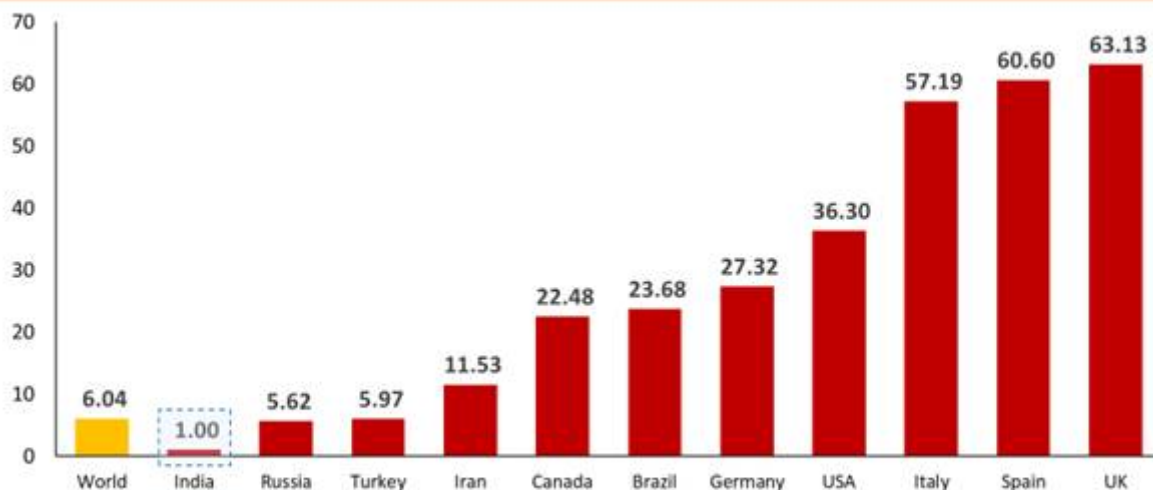

India has one of the lowest deaths per lakh population in the world

Posted On: 23 JUN 2020 1:50PM by PIB Delhi

The WHO Situation Report 154 dated 22nd June, 2020 shows that India has one of the lowest deaths per lakh population. India's cases of death per lakh population is 1.00 while the global average is more than its six times, at 6.04. The UK has witnessed 63.13 cases of COVID-19 related deaths per lakh population, while the metric for Spain, Italy and US is 60.60, 57.19 and 36.30 respectively.

In India, early detection of cases, timely testing and surveillance, extensive contact tracing coupled with effective clinical management have helped to check the case mortality. This is also a testimony to the graded, pre-emptive and pro-active approach the Government of India along with the States/UTs for the prevention, containment and management of COVID-19.

Death per Lakh Population - Amongst the Lowest in the World

(As per WHO Situation Report 154 dated 22nd June, 2020)

The recovery rate continues to improve. As on date, it is **56.38%** amongst COVID-19 patients. So far, a total of **2,48,189** patients have been cured of COVID-19. During the last 24 hours, a total of **10,994** COVID-19 patients have been cured.

Presently, there are **1,78,014** active cases and all are under active medical supervision.

The number of government labs has been increased to 726 and private labs have increased to 266, summing up to a total of **992**. The break-up is as follows:
