First Revised Estimates of National Income, Consumption Expenditure, Saving and Capital Formation, 2018-19

The First Revised Estimates for the year 2018-19 have been compiled using industry-wise/institution-wise detailed information instead of using the benchmark-indicator method employed at the time of release of Provisional Estimates on 31st May, 2019.

The salient features of the estimates at aggregate level are given in the paras that follow.

Gross Domestic Product

Nominal GDP or GDP at current prices for the year 2018-19 is estimated as Rs. 189.71 lakh crore against Rs. 170.98 lakh crore for the year 2017-18, showing a growth of 11.0 per cent during 2018-19 as compared to 11.1 per cent during 2017-18.

Real GDP or GDP at constant (2011-12) prices for the years 2018-19 and 2017-18 stand at Rs. 139.81 lakh crore and Rs. 131.75 lakh crore, respectively, showing growth of 6.1 per cent during 2018-19 and 7.0 per cent during 2017-18.

Industry-wise Analysis

Gross Value Added (GVA) at basic prices in different sectors of the economy at current and constant (2011-12) prices are presented in Statements 4.1 and 4.2 respectively. At the aggregate level, nominal GVA at basic prices has grown by 11.1 per cent during 2017-18 against 10.5 per cent during 2018-19. In terms of real GVA i.e. GVA at constant (2011-12) basic prices, there has been a growth of 6.0 per cent in 2018-19, as against 6.6 per cent in 2017-18.

Net National Income

Nominal Net National Income (NNI) at current prices for the year 2018-19 stands at Rs. 167.89 lakh crore as against Rs. 151.50 lakh crore in 2017-18, showing growth of 10.8 per cent during 2018-19 as against 11.2 per cent in the previous year.

Gross National Disposable Income

Gross National Disposable Income (GNDI) at current prices is estimated as Rs. 192.63 lakh crore for the year 2018-19, while the estimate for the year 2017-18 stands at Rs. 173.19 lakh crore, showing a growth of 11.2 per cent for year 2018-19 as against 11.1 per cent in the year 2017-18.

Saving

Gross Saving during 2018-19 is estimated at Rs. 57.13 lakh crore against Rs. 55.38 lakh crore during 2017-18. Rate of Gross Saving to GNDI for 2018-19 is estimated at 29.7 per cent against 32.0 per cent for 2017-18.
The highest contributor to Gross Saving has been the household sector, with saving of Rs. 34.47 lakh crore in the year 2018-19. The saving of private financial corporations has increased from Rs. 1.50 lakh crore in 2017-18 to Rs. 1.77 lakh crore in 2018-19 whereas the saving of the non-financial corporations marginally decreased from Rs. 20.69 lakh crore during 2017-18 to Rs. 20.60 lakh crore in 2018-19. The saving of General Government was (-) Rs. 1.96 lakh crore during 2017-18 and (-) Rs. 1.48 lakh crore in 2018-19.

**Capital Formation**

Gross Capital Formation (GCF) at the current as well as the constant prices is estimated by two approaches: (i) through flow of funds, derived as Gross Saving plus net capital flow from Rest of the World (RoW); and (ii) by the commodity flow approach, derived by the type of assets. The estimates of GCF through the flow of funds approach are treated as the firmer estimates. GCF by industry of use and by institutional sectors does not include ‘valuables’ and therefore, these estimates are lower than the estimates available from commodity flow approach.

**Consumption Expenditure**
